

More Revisions To The App

(October 4th, 2024)

- On the home page, click on the three bars in the top left of page, then after you click on customer service, on the return and exchange page in the date of purchase box add a small calendar to select the date instead of entering it manually.
- On the home page, click on the three bars in the top left of page, then after you click on shop on the loyalty card page, under the phrase “Ready to start Earning?” there is no description. Add the description that goes there.
- On the home page, click on the three bars in the top left of page, then after you click on shop, on the profile page when you click on some of the profile subcategories the pages are blank, and nothing comes up. Also, the app gets stuck or frozen on these pages don’t move. Please correct it.
- On the home page, in the three bars icon on top left of page, after you click on shop, on the my profile page, in

the first topic “My Profile” make the password visible by adding an eyelash in the password box. Also, in the third topic “My Orders” the page is blank and freezes when you click on the third topic. You must restart the phone to get back to all the topics. Plus, in the fourth topic “My Loyalty Card” make a description the English description, create a new one. On the second topic “My Addresses” put the apartment number “13B” with the rest of address, not above it or on top of it. Put the “13B” in unbold. Also, make the “City, State, Zip, Country” in this format. Switch it around to this. In the bottom left corner of home page, after, you click the account icon, make sure the same seven topics are just as accurate.

- On the home page, in the three bars icon on top left of page, after you click shop, click on My Profile, then in the second topic, “My Address” and change the language in the address boxes to English. And do the same for the saved addresses. And do the same for all the necessary topics from the top of the list of categories to the bottom. In the fourth topic “My Loyalty Card” remove the clock time from the expiration date box. Just keep the date. Plus, remove the word “connected” displayed underneath the loyalty card if it doesn’t have a purpose.

- When I log in to the app my credentials don't work. The error message says, "Email does not exist". You must sign up all over again to be able to log in. Is this a glitch caused because this site is a demo. If so, will it go away on its own? Please fix it.
- On the home page, on the top of page, remove the top image with the mannequins but try to copy the initials A and C in the left of image and replicate the using the same green color from the website. Replace the image with the initials. The same as the website.
- On home page, there are three green rectangle boxes with images, info and a loyalty card apply portal. The second rectangle box consisted of the "Lookbook" but it's missing now. Please, Add it back to App. If you start from the top and scroll down, you will see it.
- On the home page, just above the lookbook video, change the different types of images displayed on top of each category. Make them the same as the "Outerwear" image, almost animated looking instead of blueprint

design looking. Also, add the other categories from the website. Such as “Headwear” “Polos” “Accessories”. Plus, please find a way to incorporate the Request A Catalog feature on the App. I noticed it isn’t there.

- The App icon for the company should display the logo from the catalog and not the script logo. Use both names on top of one another, be creative. Also, underneath the icon is the name of the company. The first name and second name is connected. Divide them into two names. Change the name to “Antoine Crosby”.
- On the home page, in the three bars icon, on top left of page, after you click shop, then click cart and change the man standing next to the cart. Preferably a white man animated standing up like the one currently there. I like the fact that the man is holding a paper. Find something similar, be creative. If not, then any animated white race character will be okay. Make sure it corresponds with the site like the first character. Do the same when you click on the cart/shopping bag icon located in top right of home page.

- At the bottom of home page, after you click the shop icon, add the product images to all the products listed. Because they are missing.
- For all the products, be sure to choose a variety of colors. Not just one color, for the purpose of the site.
